

Aims and objectives

Aims

- To explain the difference between a convention inlay, onlay and crown preparation to a CEREC® 3D preparation. Delegates will then learn to practise this
- To discuss the different types of bonding techniques, both personal choice v evidence based
- To discuss different polishing techniques for CEREC® 3D restorations, plus basic characterisation of the CEREC® 3D restorations
- Finally, to ensure all delegates are more confident with producing well fitting posterior CEREC® 3D restorations.

Objectives

- Delegates to prepare teeth confidently for posterior CEREC® 3D restorations
- Delegates to produce well fitting CEREC® 3D inlay, onlays and crowns
- Delegates to understand the importance of bonding with CEREC® 3D and also to characterise and polish their restorations for better cosmetic results.
